

WHAT IS THE RISK TO YOUR COMPANY IF AN EMPLOYEE EMAILS CONFIDENTIAL INFORMATION TO THE WRONG PERSON?

OUTLOOK MAKES IT **TOO EASY** TO SEND AN **EMAIL** TO THE **WRONG** PERSON.

A 2008 AOL survey revealed that 32 percent of respondents had accidentally sent an email to the wrong person. In a more recent survey 78% percent of respondents said that they had accidentally sent emails to the wrong people at some time.

Setup your own rules for when the prompt will be displayed: All emails, just email sent outside the organization, critical emails ...

Send Confirm integrates inside Outlook and automatically prompts for confirmation before emails are sent out.

Message highlights the recipient's domain (the greatest risk to the company is if the email goes to a completely different organization).

Protect Your Company

- Avoid accidental disclosure of sensitive information to the wrong people
- Protect your team from wrongly typed email addresses
- Protect your team from Outlook's auto-correct
- Decrease your organization's risk of liability

For Your IT Team

- Customize the message displayed to the user based on corporate and legal requirements
- Deploy the software from a central server
- Modify and deploy new settings centrally when required
- Lock and hide all (or selected) settings from users
- Corporate customers and resellers get priority support

Our **addins** protect thousands of **Outlook** users **everyday** all over the world
